Week 8 Day 2

BDD (Behavior Driven Development)

It is a software development approuch in which developer, testers, and business stakeholders collaborate to define and understand how an application should behave before or during development.

Given - When - Then syntax

It is a way to describe a test scenario in BDD. Each keyword represents a different part of the behavior being tested

Keyword	Meaning	Example
Given	- The initial context	Given the user is on login page
When	- The action / event	When user enter vaild crede.
Then	- The expected outcome	Then the user should reach homepage
And	Adds another related step	And the welcome mess com
But	- Adds a contrasting condition	But pass shouldn't be visiable. or displayed

Gherkin

It is a business readable domain specific language used to describe application behavior in structured format.

Common Keywords for Gherkin

Keyword	Purpose
- Feature	Describes the functionality being test
- Scenario	Define one specific example or test case
- Given	Specifies the initial condition
- When	Specifies an action or event
- Then	Specifies the expected result
- And	Adds another related step
- But	Adds a contrasting condition

Feature file

A feature file is a text file with the .feature extension that contains a feature description and it's test scenarios written in Gherkin syntax
